Textbook

J. Stewart, *Multivariable Calculus*, (6th edition).
Note: the UB custom 6th edition is identical to the standard 6th edition.

Maple

Some lectures will be illustrated with calculations done in Maple - a powerful mathematical computation software. You will not be required to work with Maple on your own, but you may want to try it anyway. It is available at all public CIT sites. You can also buy a one year license for Maple at UBMicro for a nominal charge.

Homework

Homework problems will be assigned each Thursday and will be collected after class the following Thursday. Graded assignments will be distributed during recitation sessions. Only selected homework problems will be graded.

Recitation sessions will be devoted to answering any questions regarding homework problems you may have.

Exams

Midterm exams: Thursday, October 2
Thursday, November 6
Thursday, December 4

There will be no final exam for this class

Grading
